

BELIZE HIGH SEAS FISHING VESSEL CIRCULAR

FVC-13/07

Issued: 21st March 2013

Rev: 1

TO: ALL SHIPOWNERS, OPERATORS, CHARTERERS, MASTER AND CREW, DEPUTY REGISTRARS AND RESIDENT AGENTS

SUBJECT: CONSERVATION OF THRESHER SHARKS CAUGHT IN ASSOCIATION WITH FISHERIES IN THE IOTC AREA OF COMPETENCE

Reference: Issued in accordance with Part II 3 (1)(f) and Part VII 19(1)(2) of the Belize High Seas Fishing Act, 2003

BACKGROUND:

Thresher sharks as well as other shark species are typically caught as by-catch in the IOTC area of competence. Scientific studies point out that the bigeye thresher sharks (*Alopias superciliosus*) is particularly endangered and vulnerable. Additionally, it is very difficult to differentiate between various species of thresher sharks without taking them on board and that such action might jeopardize the survival of captured individuals. It was therefore decided that measures need to be implemented to ensure the sustainability of this species of shark.
